

SAP Business Technology Platform (BTP)

Apiphani implements SAP BTP with the structure and foresight enterprise systems need and the client service they deserve.

When BTP becomes the “everything layer” for integration, extensions, automation, applications and analytics, it can either accelerate progress or become a sprawl of services, costs, and half-owned responsibilities. **Let us help you accelerate progress.**

Where We Excel

- 
BTP Architecture & Design
aligned to your SAP roadmap and operating model
- 
Integration Strategy & Delivery
– APIs, events, integration patterns, integration governance
- 
Observability & Operational Readiness
so the platform is supportable, not fragile
- 
Service Orchestration & Management
across teams and vendors
- 
Extension & Development for SAP and Adjacent Apps
built to enterprise standards
- 
BTP Governance & Cost Discipline
so services are intentional, used, and owned (not just activated)

Why Teams Come to Us

You are modernizing to SAP Cloud ERP and need a clean extension and integration path.
Your integration landscape is fragmented (CPI, APIs, middleware, custom) and incidents keep repeating.
BTP services are proliferating with unclear ownership and uncontrolled spend.
You need faster delivery without adding risk to a mission-critical environment.

What You Can Expect

- 30**
DAYS

 - Current-state inventory
 - Ownership model
 - Baseline cost and usage view
 - Prioritized BTP roadmap
- 60**
DAYS

 - Reference architecture
 - Integration guardrails
 - The first wave of “fix the repeat offenders” improvements
- 90**
DAYS

 - Measurable reliability gains
 - Cleaner change processes
 - A platform posture your teams can sustain

Why apiphani

- Our outcomes-first mindset**
means your mission-critical SAP environments are stable, secure, and deliver real results.
- Our senior practitioners**
with an average of 16 years in SAP, offer a customer-centric, high-touch experience.
- We thrive in complex environments**
bringing clarity, control, and confidence where others stall.
- No overbuilding. No underplanning.**
Simply the setup you need to move forward with confidence.
