

SAP Cloud ERP Private Cloud Edition

Move to SAP Cloud ERP Private Cloud Edition with fewer surprises, fewer gaps, and a support model that works.

The architecture changes. The responsibility model changes. The risk changes. **Your support approach has to change too.**

The Challenge

SAP bundles many technical services into the subscription, but important operational and security needs can still fall into gray areas. That gap becomes your downtime, your audit pain, and your internal firefighting.

Our Solution:

Aegis | Supplemental Support for SAP Cloud ERP

Aegis is apiphani's managed service that closes the operational and security gaps left by SAP's standard subscription, providing **continuous monitoring, proactive improvement, and support** before, during, and after your move to Private Cloud Edition.

Services We Deliver

- ✓ **Cloud ERP Migration Advisory and Execution Support** — planning, cutover, stabilization
- ✓ **Operating Model Design** — roles, responsibilities, and escalation paths
- ✓ **Security and Compliance Support** aligned to enterprise expectations
- ✓ **Observability and Incident Reduction** — less noise, faster resolution
- ✓ **Ongoing Managed Services** with SLAs that matter
- ✓ **Assist in navigating SAP's Support Network**

If you are moving to SAP Cloud ERP Private Cloud Edition, we'll help you mind the gaps, stabilize faster, and run the environment with confidence.

Why apiphani

Our advisory services help you define the right SAP Cloud migration approach for this often confusing process.

We de-risk your SAP Cloud ERP migration with supplemental support for those RACI tasks that remain the customer's responsibility.

We complement SAP security with three (3) cloud security offerings to fit any company's specific needs.

We're proud to be a SAP Silver Partner, trusted to run complex landscapes where performance meets compliance.

Our senior practitioners with an average of 16 years in SAP, offer a customer-centric, high-touch experience.

We have an SAP Services Competency on AWS certification while also remaining hyperscaler agnostic.
