

# Executive Advisory Workshop: Your Path to SAP Cloud ERP

Apiphani brings many years of enterprise SAP expertise directly to your team – helping you navigate SAP Cloud ERP (Private Cloud Addition), Clean Core methodology, and SAP Business AI – delivered by senior SAP practitioners with deep regulated-industry expertise. **One focused session. Tangible findings. A clear road forward.**

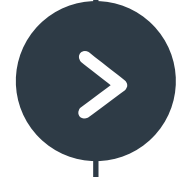

SAP CLOUD ERP  
CLEAN CORE  
BUSINESS AI  
SYSTEM TRANSFORMATION

## Our Engagement Process: **From First Conversation to Clear Road Map**

### Stakeholder Discovery

60 Mins. • Virtual

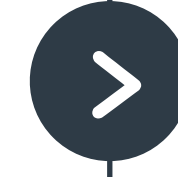

Align current SAP landscape, SAP Cloud ERP readiness goals & business priorities

### Facilitated Advisory Workshop

Up to 4 Hrs. • On-site

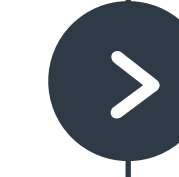

Deep-dive into Clean Core posture, migration complexity & AI enablement opportunities

### Impact Assessment

3-5 Business Days

Analysis benchmarked against SAP best practices, quality gates & transformation patterns

### Findings & Roadmap

Read Out & Next Steps

Prioritized migration path, quick wins & a phased SAP Cloud ERP adoption plan

## Workshop Focus: **What We Examine Together**

### Implementation & Methodology

Clean Core success plan, guided onboarding & quality gates

- > Clean Core assessment – custom code & extensibility audit
- > SAP-guided onboarding via SAP Cloud ERP success plan milestones
- > Quality gate framework: readiness, fit-to-standard & go-live
- > BTP extension strategy to preserve clean core compliance
- > Fit-to-standard workshop approach & delta design methodology

### Commercial Offerings & Business AI

S/4HANA Cloud Private Edition features & SAP AI capabilities

- > Latest SAP Cloud ERP feature landscape review
- > SAP Joule AI assistant – use case identification & readiness
- > SAP Business AI embedded across specific functional workflows
- > SAP Cloud ERP commercial model: TCO analysis & licensing optimization
- > SAP BTP AI Services & integration hub capabilities

### System Transformation

On-premise to cloud: process improvement & data modernization

- > Migration path assessment: brownfield and Bluefield (selective data migration)
- > Business process redesign aligned to SAP best-practice processes
- > Data modernization: governance, quality & migration strategy
- > Infrastructure transition – hyperscaler selection considerations and criteria
- > Organizational change management & user adoption planning

## Why Teams **Come to Us**

- ✔ Leadership has a SAP Cloud ERP mandate but the migration path is unclear
- ✔ On-premise custom code threatens Clean Core compliance at go-live
- ✔ Assistance building the business case for migrating to SAP Cloud ERP
- ✔ SAP Business AI potential exists but data readiness is unknown
- ✔ Multiple business units need alignment before committing to a conversion approach
- ✔ Your company's regulatory compliance needs require specialized US-based resources
